Contents of Volume 34

Number 1, August 1980

NINH NGUYEN, JACQUES CHOISNET, ET BERNARD RAVEAU. Silicates synthétiques à structure milarite 1

A. TOMAS, L. BROSSARD, AND M. GUITTARD. Structural Studies by X-Ray Diffraction and Mössbauer Spectroscopy of Cubic $FeYb_2S_4$ and $FeLu_2S_4$ . . . 11

J. P. GUHA. Subsolidus Equilibria in the System $BaO–TiO_2–Al_2O_3$ 17

A. MAURER AND G. COLLIN. Structural and Physical Properties of $Cr_{3\pm x}Se_4$ ($x \leqslant 0.20$) 23

S. W. KENNEDY. Structural Correspondences and Mechanisms for the Polymorphic Transformations NaCl ⇄ CsCl Type and NaCl ⇄ Rhombohedral 31

O. GREIS. A Contribution to the Structural Chemistry of *A*-Type Rare Earth Sesquioxides 39

A. NØRLUND CHRISTENSEN, S. E. RASMUSSEN, AND G. THIRUP. Superconductivity of Some Transition Metal Compounds 45

SHIGEO HORIUCHI, KUNITAKA MURAMATSU, AND MASAJI SHIMAZU. Intergrowth in Complex Bismuth Oxides, $Bi_2CaNa_{n-2}Nb_nO_{3n+3}$ ($n = 5 \sim 8$), Revealed by 1-MV High-Resolution Electron Microscopy 51

PAUL S. HARADEM, BERTRAND L. CHAMBERLAND, AND LEWIS KATZ. The Structure of the 27-Layer Polytype of $BaCrO_3$ 59

H. W. ZANDBERGEN AND D. J. W. IJDO. Neutron Diffraction Experiments on $CsCrI_3$ at 300, 77, and 1.2 K 65

S. W. KENNEDY AND W. M. KRIVEN. Topotaxial Decomposition of Calcite-Type KNO_3 Crystals 71

S. ALEONARD, Y. LE FUR, M. F. GORIUS, ET M. TH. ROUX. Structure cristalline de la phase β-KEr_2F_7. Composés isotypes 79

K. TORKAR UND W. INSELSBACHER. Thermodynamische Untersuchungen am System CoO–MgO 91

TJIPKE HIBMA. X-Ray Study of the Ordering of the Alkali Ions in the Intercalation Compounds Na_xTiS_2 and Li_xTiS_2 97

PHILIPPE ODIER AND JEAN-PIERRE LOUP. An Unusual Technique for the Study of Nonstoichiometry: The Thermal Emission of Electrons. Results for Y_2O_3 and TiO_2 107

INMACULADA FERNANDEZ, ROBERT GREATREX, AND NORMAN N. GREENWOOD. ^{99}Ru Mössbauer Spectra of Quaternary Ruthenium(V) Oxides with the Hexagonal Barium Titanate Structure 121

ABSTRACTS OF FORTHCOMING ARTICLES 129

Number 2, September 1980

H. J. DE BRUIN AND S. P. S. BADWAL. Free Energy of Formation of PdO by Impedance Dispersion Analysis 133

MARK G. SHILTON AND ARTHUR T. HOWE. Studies of Layered Uranium (VI) Compounds. III. Structural Investigations of Hydrogen Uranyl Phosphate and Arsenate Tetrahydrates below the Respective Transition Temperatures of 274 and 301°K 137

ARTHUR T. HOWE AND MARK G. SHILTON. Studies of Layered Uranium (VI) Compounds. IV. Proton Conductivity in Single-Crystal Hydrogen Uranyl Phosphate Tetrahydrate (HUP) and in Polycrystalline Hydrogen Uranyl Arsenate Tetrahydrate (HUAs) 149
G. BERTRAND, M. COMPERAT, AND M. LALLEMANT. Endothermic Decompositions of Inorganic Monocrystalline Thin Plates. II. Displacement Rate Modulation of the Reaction Front 157
I. J. MCCOLM AND S. J. WILSON. The Reaction of Cubic Sodium Tungsten Bronzes, Na_xWO_3, with Metallic Iron 167
R. C. T. SLADE, T. K. HALSTEAD, AND P. G. DICKENS. NMR Study of Hydrogen Molybdenum Bronzes: $H_{1.71}MoO_3$ and $H_{0.36}MoO_3$ 183
G. D. FALLON AND B. M. GATEHOUSE. Crystal Structures of Some Niobium and Tantalum Oxides. VIII. The $5Rb_2O{:}14.6Ta_2O_5$ Phase—A Tunnel Structure . 193
JEAN-LOUIS BERCHOT, DANIEL VIVIEN, DIDIER GOURIER, JEANINE THERY, AND ROBERT COLLONGUES. Ion Exchange Properties of β-Eucryptite ($LiAlSiO_4$): EPR Investigation on Copper-Doped Single Crystals 199
CARL W. TURNER AND J. E. GREEDAN. Ferrimagnetism in the Rare Earth Titanium (III) Oxides, $RTiO_3$; R = Gd, Tb, Dy, Ho, Er, Tm 207
TED B. FLANAGAN, C. A. WULFF, AND B. S. BOWERMAN. Thermodynamics of Hydrogen Trapping in Intermetallic Compounds: Application to $LaNi_5/H$ . . 215
I. MAYER, A. SEMADJA, AND V. WEISS. Lead Phosphate Apatites Substituted by Rare Earth, Sodium, and Potassium Ions 223
E. R. WHIPPLE, S. N. SUBBARAO, AND F. P. KOFFYBERG. Electronic Properties of Semiconducting Cd_2GeO_4 231
G. YAMAGUCHI, M. SHIMADA, M. KOIZUMI, AND F. KANAMARU. Preparation and Characterization of Compounds of the System $Fe(Sb_{1-x}Te_x)_2$ ($0 \leq x \leq 1.0$) . . 241
R. CHEVREL, M. POTEL, M. SERGENT, M. DECROUX, AND Ø. FISCHER. One-Dimensional Condensation of Mo_6 Octahedral Clusters: A New Cluster, Mo_{12}, and a New Building Block, $Mo_{12}S_{14}$, in $M_2Mo_9S_{11}$ 247
C. RIEKEL, H. G. REZNIK, AND R. SCHÖLLHORN. Neutron Diffraction Study on the Mechanism of the Topotactic Reduction of 2H–TaS_2 Electrodes 253
ROALD HOFFMANN, SASON SHAIK, J. C. SCOTT, MYUNG-HWAN WHANGBO, AND MARY J. FOSHEE. The Electronic Structure of $NbSe_3$ 263

Number 3, October 1980

BERNADETTE SAUBAT, MARCUS VLASSE, AND CLAUDE FOUASSIER. Synthesis and Structural Study of the New Rare Earth Magnesium Borates $LnMgB_5O_{10}$ (Ln = La, . . . , Er) 271
T. C. GIBB AND R. GREATREX. A Study of Magnetic Interactions in M_2EuRuO_6 (M = Ca, Sr, Ba) by ^{151}Eu Mössbauer Spectroscopy 279
G. MÜNNINGHOFF, W. TREUTMANN, E. HELLNER, G. HEGER, AND D. REINEN. Structure and Jahn–Teller Effect in Mixed Crystals $Rb_2Cr_{1-x}Mn_xCl_4$; A Single-Crystal Neutron Diffraction Study and Spectroscopic Results 289
C. P. J. M. VAN DER VORST AND W. J. A. MAASKANT. Stereochemically Active $(5s)^2$ Lone Pairs in the Structures of α-InCl and β-InCl 301

S. J. Wilson and J. D. C. McConnell. A Kinetic Study of the System γ-$AlOOH/Al_2O_3$ 315
P. H. Duvigneaud and R. Derie. Shape Effects on Crystallite Size Distributions in Synthetic Hematites from X-Ray Line-Profile Analysis..... 323
K. Hariharan. Electrical Ionic Conductivity and Optical Absorption Studies on Superionic Compound $RbAg_{4-x}Cu_xI_5$ Films 335
Peter E. Childs, Arthur T. Howe, and Mark G. Shilton. Studies of Layered Uranium (VI) Compounds. V. Mechanisms of Densification of Hydrogen Uranyl Phosphate Tetrahydrate (HUP): Pressure-Induced Planar Glide and Solution Phase Sintering 341
S. Aronson, J. Klahr, and L. Stemp. Chemical Stability of Complexes of Iodine with 2,2-Diphenyl-1-picrylhydrazyl and Naphthalene 347
A. Likforman, M. Guittard, A. Tomas, et J. Flahaut. Mise en évidence d'une solution solide de type spinelle dans le diagramme de phase du systeme In–S 353
G. Furdin, D. Billaud, A. Herold, C. Zeller, and A. Marchand. Existence of a Magnetic Susceptibility Anomaly in the Ternary Systems $M'_{1-x}M_xC_8$ 361
Takashi Kimura and Tosio Sakurai. Crystal and Molecular Structure of Tris-(hexaamminerhodium(III)) Tetrakis(trichlorostannato(II))(Tetrachlorostannato-(II)) rhodate (I) Hexachlorostannate(II) Tetrahydrate..... 369

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of this or her contributions to the journal.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal. Manuscripts should be submitted to the Editor (M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member of the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5×28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lower-case italic letters (^{a,b,c}). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must be deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page (this corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $15.00 for up to 98 pages of standard-size or 48 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

See NAPS document No. — for — pages of supplementary material. Order from ASIS/NAPS c/o Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, New York 10017. Remit in advance for each NAPS Accession number. Institutions and organizations may use purchase orders when ordering; however, there is a billing charge for this service. Make checks payable to Microfiche Publications. Photocopies are $5.00. Microfiche are $3.00. Outside the U.S. and Canada, postage is $3.00 for a photocopy or $1.50 for a fiche.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5×28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after reduction of the figure to single-column width. The difference in type size within a figure should be no more than approximately 15%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. Each figure should be identified on the back with the author's name and figure number. Figures are to be cited in the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten with an Arabic number if necessary for reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name, journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts' Service Source Index.* For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.
